DETAILED ACTION

Election/Restriction

1. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 31-41 and 49-54, drawn to variant HGF polypeptides.

Group II, claim(s) 42-44 and 55-57, drawn to variant HGF polypeptide antagonists. Note that it is assumed these molecules are structurally distinguishable from those of Group I. Otherwise, these would be duplicative products.

Group III, claim(s) 45-48, drawn to methods of treating patients with variant HGF polypeptides, and the pharmaceutical compositions required for such.

Group IV, claim(s) 58-63, drawn to polynucleotides encoding variant HGF polypeptides, vectors, host cells, and methods of producing these growth factors.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1647

Group I is directed to variant HGF polypeptides, which is the first product. However, because Snow Brand Milk Products Co Ltd (EP O 757994 A) teach variant HGF polypeptides that meet the recited claim limitations, no special technical feature exists for Group I as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Groups I, II and IV are also drawn to a structurally different products, which do not require each other for their practice and do not share the same or a corresponding technical feature. The technical feature of Group II is drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, and because the technical features of the Group II-IV inventions are not present in the Group I claims, unity of invention is lacking.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1647

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Robert Hayes whose telephone number is (703) 305-3132. The examiner can normally be reached on Monday through Thursday, and alternate Fridays, from 8:30 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz, can be reached on (703) 308-4623. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
